

EU CERTIFIED FACADE INSTALLATION & MAINTENANCE \_\_\_\_\_

Installation is the bedrock of every construction project. Incorrect installation and poor workmanship on the building envelope can increase the risk of safety hazards, lead to structural failures and reduce the lifespan of its components, while raising maintenance costs considerably. GLASSCON provides safe, solid and cost effective solutions to all aspects of facade installation, from a simple mastic seal curing a leak to installing glazing panels on high rise buildings with complex geometry.

#### EUROPEAN CERTIFIED FACADE INSTALLATION TEAM

All of our operatives are trained and certified by TÜV Nord in accordance with the strictest European regulations and working at height requirements. During the erection phase, GLASSCON's installation team guarantees quality control of uploading, unpacking and storage of all sensible materials like silicone, gaskets, fire rated glass, which must be handled with care and according to strict material specifications.

#### SUPERVISION & SITE ENGINEERING SERVICES (QA/QC)

Aside from installation services, GLASSCON offers project management, site engineering and supervision services on a "day-rate" basis.

#### BMU / MAINTENANCE SERVICES

Regardless of whether a BMU unit has been installed, GLASSCON can undertake the maintenance of the architectural building envelope including functionality improvements, components' replacements, cleaning, integration of BMU units etc.
